Santhosh Kumar Jayaraman

Hiring for Multiple Roles | Fractional CTO | Investor | Ex-xto10x , EF Bengaluru, Karnataka, India

Summary

I am an alumnus of GCT, Coimbatore, and the co-founder of Incresco Group of Companies and CampEd, where I lead technology-driven innovation and product development alongside my partner, Parthiban. My career began as a tester at Infosys, but my passion for coding and technology led me to transition into development roles, working with global MNCs such as Infosys, Education First, Radiometer, and xto10x. These experiences laid the foundation for my entrepreneurial journey and my commitment to building impactful tech solutions.

I am deeply fascinated by emerging technologies, particularly Artificial Intelligence (AI), Large Language Models (LLMs), and the development of AI-powered applications and agents. I am constantly exploring advancements in the tech space, striving to leverage AI to drive innovation, enhance software development practices, and create transformative solutions.

Beyond my professional endeavors, I am passionate about mentoring young talent and empowering the next generation of engineers and entrepreneurs. I believe in fostering a culture of curiosity, collaboration, and innovation, and I am dedicated to helping others unlock their potential in the ever-evolving tech landscape.

I am excited to continue pushing the boundaries of technology, building solutions that make a difference, and contributing to the growth of the tech community. Let's connect and collaborate to shape the future of innovation together!

Experience

Incresco
